

Better Information, Better Outcomes

Our State Data System Empowers Schools

WISEdash for Districts

WISEdash for Districts allows you to turn data into information quickly and easily, so you can make more informed decisions about student learning.

Check out these updated features:

- Enhanced dashboards to help with district and school data verification for upcoming snapshots
- Improved supports for data inquiry processes and continuous improvement planning through WISExplore
- Expanded district-wide use of student data to drive school improvement
- Secure platform to view student outcomes that protect student privacy

Enhanced Improvement Planning

The Data Inquiry Journal allows educators and administrators to document ongoing data investigation and design continuous improvement plans all in one convenient location.

Includes all essential components for continuous improvement in one tool.

Meets requirements for continuous improvement planning in ESSA and IDEA.

Early Warning Tools

WISEdash for Districts offers several early warning tools, including Absenteeism and the school and district report card Target Group Preview dashboards. Using these tools provides information to help schools identify students who are at risk of experiencing chronic absenteeism and who may be identified in each school's target group for future school and district report cards.

Improved Snapshot Reporting

Use WISEdash to review your data before a snapshot. WISEdash has additional features to help you check your data as you prepare for the snapshot such as viewing current and trend data on topic-specific dashboards as well as advanced analysis snapshot dashboards to view current data and demographics compared to a prior year's snapshot data.
