

**Release Notes for 1/25/2018 WISEid/WISEstaff
Production Release
(Core Apps Team Sprint 152 2-Week Work Cycle)**

Feature Title	Notes
<p>WISEid: Requesting Agency no longer shows as Dependent Agency for Local Person ID changes</p>	<p>We fixed a design flaw where the requesting agency for a Local Person ID Change Request was added to the list of dependent agencies needing to vote.</p>
<p>WISEid: Hotfix-- Person Uploads now processing without faulting</p>	<p>Prior to this release, we had a hotfix to correct an issue that caused faults or uploads that didn't show any results.</p>
<p>WISEid: New method to alert, review, and revert significant changes to WISEid records</p>	<p>When there are substantial changes to the birth date or a suffix that's changed from one suffix to another, we now create a Change Request for DPI staff to review. This review process will ensure you have the correct person.</p>
<p>WISEid: Multiple large uploads at the same time no longer cause fault</p>	<p>There was an issue that was especially impacting large districts doing multiple uploads where faults occurred for all file types. This has been resolved, so multiple large uploads can be done at the same time now.</p>
<p>WISEstaff: School updates in Assignment UI retains valid grades only</p>	<p>We changed the Assignment UI when you upload grades outside the valid range of the assignment and school combination. Now you will be able to see all grades, but grades that are not allowed for the assignment will be grayed out.</p>

	<ul style="list-style-type: none"> ● When you save an assignment in the UI, the grayed-out, invalid grades will be removed. ● If you have the incorrect school or assignment, you can update the assignment code or school in the UI and save without losing the grades you originally uploaded so long as they are valid for the assignment and school combination at the time of saving.
<p>WISEstaff: Fixed Error 5700 to display only agencies with FTE conflict</p>	<p>We fixed an issue for Error message 5700 about cross-agency FTE issues, including agencies with no FTE. Also, message 5700 was generated in hiring agencies where the staff person had no FTE, so now we have removed the error when they had no FTE to adjust.</p>
<p>WISEstaff: Resolved Validate Staff Page - Refresh Validation paging issue</p>	<p>We had an issue where validation messages disappeared when filtering on warnings. Before, if you went to a page with both acknowledged and unacknowledged warnings and unchecked 'Show acknowledged warnings', then you wouldn't see any rows, even if you had unacknowledged warnings. This was fixed, so once you refresh, the validation filters should reset.</p>
