

**Release Notes for 1/9/2018 WISEid/WISEstaff Production Release  
(Core Apps Team Sprint 151 4-Week Holiday Work Cycle)**

Feature Title	Notes
<b>WISEid:</b> DPI CST can view Submitter User Name to resolve potential duplicates.	DPI Customer Services Team can now see the name of the user who submitted a potential duplicate, so they can contact the user if they require further information.
<b>WISEid/WISEstaff:</b> Denied Change Request no longer requires response.	We fixed a bug where Change Request details indicated a response was needed when the Change Request final status was already Denied.
<b>WISEid:</b> Created error for Contract File Upload rows that have an invalid staff Entity ID	If an Entity ID is submitted by Contract upload and it is not a valid Entity ID for anyone in the system, now an error will display in the Contract Results Download file Message Text field stating, "Entity ID provided isn't valid in the ELO system, so a Change Request will not be created. Please provide a valid Entity ID." If the Entity ID isn't a valid one, a Change Request will not be created, even if districts submit one. This is only for Entity IDs that do not belong to anyone in the state.
<b>WISEid:</b> Improved usability of Submit Duplicates function	<p>We modified the WISEid &amp; WISEstaff Search/Edit screens and Review Matches screen to make the Report Duplicates column clearer. We moved the Report Duplicates checkboxes and Comment area to the far right.</p> <p>We also increased the character limit for the Comments, which now allows for 1000 characters. Comments will display for DPI when CST reviews potential duplicates submitted by district agencies.</p>
<b>WISEid:</b> Error counts removed from Person Uploads when another upload corrects the error and made change in Error Status	We changed the Person uploads on the Results screen, so if you have an upload with an error for a person who has a specific Local Person ID and Local Person ID Type and then you upload another file

	<p>that fixes the error in the original file, the error count will be hidden.</p> <p>We also added a new column in the Results Download file and the Download Transaction History files for "Error Status". The Error Status will either be "Active", meaning the error is still a problem, or "Resolved", meaning a later upload fixed the issue.</p>
<p><b>WISEstaff:</b> Updated Audit URL and text announcing the 2017-18 Audit Report</p>	<p>Audit announcement text and attached pdf letter have been updated for 2017-18.</p>
<p><b>WISEstaff:</b> Added '0000 District-Wide' school value for Marathon Co CDEB</p>	<p>We added the ability for Marathon Co CDEB to report as a hiring agency using the 0000 value.</p>
<p><b>WISEstaff:</b> Added message and process to Clear Non-required Data when an assignment has grades outside a school/district range</p>	<ul style="list-style-type: none"> <li>● We added Info message 5866 when an assignment requires grades but has grades outside the valid range for that school.</li> <li>● When rule 5866 is true, we will remove all grades outside the school range when running the Clear Non-Required Data process.</li> <li>● We added Info message 5867 when an assignment requires grades and has a school value of '0000-District-wide' but has grades outside the valid range for the district.</li> <li>● When rule 5867 is true, we will remove all grades outside the district range when running the Clear Non-Required Data process.</li> </ul>
<p><b>WISEstaff:</b> Changed Year validation in Assignment &amp; Contract uploads to assess at the row level</p>	<p>We changed validation of the Year value in Assignment and Contract Uploads to be row based instead of presenting an error for the whole file. Previously, if even one row was incorrect, the whole file would be rejected for upload. Now first-level validation error 4110 will generate for each row with a year other than the active collection year. This will make it clearer</p>

	<p>which rows need to be corrected and reuploaded.</p>
<p><b>WISEstaff:</b> Now displaying Code value instead of Description value for 'DPI License Required' column</p>	<p>WISEstaff Assignment Code List and Public Annual Dynamic Assignment Report (UI and Export) accidentally had a long description for DPI Licensed Required. We changed descriptions back to "Y" or "N".</p>
<p><b>WISEstaff:</b> Removed error 5865 from assignment codes 51 &amp; 52 and created new info message</p>	<p>We fixed an issue where we were incorrectly generating error 5865 for assignment position codes 51 &amp; 52. These assignments don't require districts to report grades.</p> <p>We also introduced validation 5761 to indicate grades are not required for positions 51 &amp; 52 and added the fields to the Clear Non-Required Data process. Now the process will remove any grades reported for these positions. For these positions, DPI generates all school or district grades necessary for agencies based on School Directory data in final reporting.</p>
<p><b>WISEstaff:</b> Roadmap status correct</p>	<p>We fixed issues on the Annual Staff Collection Roadmap, including:</p> <ul style="list-style-type: none"> <li>● We changed the Preliminary Audit Reports Ready indicator, so it only turns green when there are preliminary results ready in an active collection year.</li> <li>● We changed the Final Audit Reports Ready indicator, so it only turns green when there are final results ready in an active collection year.</li> <li>● We used a new toggle to determine when "Final Snapshot Taken WISEstaff Read only" is on or off.</li> </ul>
