

**Release Notes for 12/12/2017 WISEid/WISEstaff Production Release  
(Core Apps Team Sprint 149 2-Week Work Cycles)**

<b>Feature Title</b>	<b>Notes</b>
<b>WISEid:</b> Added Student Reference to Person when user changes Local Person ID Type from Staff to Student	We corrected a blocking issue where in WISEdata a person was not allowed to be a student when he or she previously had a staff Local Person ID and type and was later changed to a student Local Person ID.
<b>WISEid:</b> Duplicate Multiple Potential Match handled for file upload	If you upload a person in multiple person uploads with the same Local Person ID, the person will come up in Review Matches or Resolve Duplicates only once with the most recent record.
<b>WISEid:</b> Redacted agencies no longer show agency name in Change Request search filter.	We fixed a loophole that allowed Redacted Agencies' real names to be found by an agency filter.
<b>WISEstaff:</b> Aggregate Staff Report not working & Enter Aggregate Staff FTE UI not using correct field	We fixed an issue that previously prevented the Aggregate Staff Report from working. We also fixed an issue where the FTE was not coming through correctly after a change to real FTE number format.
<b>WISEstaff:</b> Change Request updates Denied status for Entity IDs immediately	Previously when DPI denied a Change Request, it would not immediately change the overall status to Denied. It would wait until overnight to get to Denied status, but now it is resolved and shows immediately.
<b>WISEstaff:</b> Hotfix-- Contract no longer faulting for Marathon Co CDEB	We fixed an issue where an assignment with a district-wide 0000 school would cause faults for Marathon Co CDEB and not allow selection in the UI.
<b>WISEstaff:</b> Hotfix-- Removed trailing spaces and commas in Name field	We removed leading and trailing spaces AND all commas from Name field data. This corrects issues for Last Name that were created when we moved suffixes out of last name but accidentally left behind spaces and commas.

<p><b>WISEstaff:</b> Public Administrative Salary Report High Degree now displaying.</p>	<p>The Highest Degree was missing from the Public Administrative Salary Report, but this was corrected.</p>
<p><b>WISEstaff:</b> Removed Position Type column from Assignment Code List/Dynamic Assignment Report</p>	<p>We removed the Position Type column from the Assignment Code List. It was causing confusion because of the Licensed classification for Positions, but it is not the same as the License Required value for the assignment.</p>
<p><b>WISEstaff:</b> Comments now required for federal reportable warnings</p>	<p>Warning Codes 6358, 6359, 6360, 6411 require comments for federal reporting purposes. If you previously acknowledged them and didn't provide a comment, we have removed the acknowledgment. They are also not allowed to be OK by Code on the Validate Staff Data page as a comment is necessary for each.</p>
<p><b>WISEstaff:</b> Sorted Requesting Agency and Dependent Agency filter lists alphabetically</p>	<p>On Message &amp; Change Requests we fixed an issue where the Requesting Agency and Dependent Agency filter list was not alphabetically sorted.</p>
<p><b>WISEstaff:</b> Synchronized Assignment Codes in Filter Assg Code List reports and Annual Dynamic List reports</p>	<p>We fixed an issue where assignments were missing from Assignment Code List report filters.</p>
<p><b>WISEstaff:</b> Updated Audit and Certification Terminology</p>	<p>We changed all references of first certification to "Preliminary Audit Certification". To display consistent terminology, we no longer use the word "initial".</p>
