

**Release Notes for 3/23/2017 WISEid/WISEstaff Production Release  
(WISEid Core Apps Sprint 131 2-Week Work Cycle)**

<b>Feature Title</b>	<b>Notes</b>
<b>WISEid:</b> Bug Fix-- The Potential Matches Filter by Upload Local Person ID Type works again.	On the Review Matches pages the filter that allows you to filter for Staff vs Student uploads was broken but is now fixed and working.
<b>WISEstaff:</b> Bug Hotfix-- Contract Upload values will not update to null after data is set.	We fixed an issue where if a value for a person's contract was set to any value, a future upload can't set it back to null. We also found a similar issue with UI if values were set, but if you later tried to set any of the values back to null, the whole record changes were blocked. This is fixed, so values will no longer be nulled.
<b>WISEstaff:</b> Aggregate Assignment Report is available.	We created a report of all the Aggregate Assignment FTE with sums. The Report is on the WISEstaff tab under Reports/Validations. It's titled Aggregate Staff Report.
<b>WISEstaff:</b> All Staff Report Header now displays the selected year instead of always showing the current year.	We fixed an issue on the All Staff Report when years other than the current year were selected the title on the report didn't adjust to say the correct year. Now it displays the selected year.
<b>WISEstaff:</b> Contract UI allows you to save without running validation.	When saving Contract UI edits, the validation is taking a while. To compensate we have split <b>Save</b> from <b>Run Validation</b> into two separate buttons. If you just click Save, validation will not run, but your changes will save. You can run the validation for all changes from Validate Staff Data instead. If you click Run Validation, it will both save values and run validation for that record, which may take about 30 seconds more.
<b>WISEstaff:</b> DPIMaster is now receiving updates for closed schools and agencies.	There were about 40 schools marked open that were in fact closed. We fixed the logic, so the validation messages about

	<p>these closed schools missing staff will work correctly and will not create false messages.</p>
<p><b>WISEstaff:</b> FTE, Contract Days, and Salary Data Validation Report changes made to FTE data.</p>	<p>We made corrections to the Data Validation Report - FTE, Contract Days, and Salary. Report is limited to FTE from assignments of type 0, Professional Special Education, and type 1, Professional Regular Education, that are not subcontracted. We also added a footnote to this fact.</p>
<p><b>WISEstaff:</b> FTE, Contract Days, and Salary Report can now be downloaded.</p>	<p>We created a CSV download button for the FTE, Contract Days, and Salary Report.</p>
<p><b>WISEstaff:</b> Local Experience compared to Total Experience validation waits for correction when Local Experience entered exceeds the total.</p>	<p>In the Contract UI when Local Experience is greater than Total Experience when attempting to save it should keep the Contract edit open until you correct this issue and save with the correct values. We still have an issue where you can't easily differentiate between issues on the Contract that you can save with versus those it will block you from saving. All are in red, and it's not even very clear the record didn't save. We will be fixing that in the next release.</p>
