

**Release Notes for 4/20/2017 WISEid/WISEstaff Production Release  
(Core Apps Team Sprint 133 2-Week Work Cycle)**

<b>Feature Title</b>	<b>Notes</b>
<b>WISEid:</b> Review Matches Column Sorts by Name.	Review Matches and Results - Potential Matches is sorted now by last name and first name. Additionally, we have included advanced filters on Last and First name fields to help find persons. Filter now has a 'Contains' feature for searching by partial matches.
<b>WISEid:</b> Fixed Change Request Filter & Messages	When a Change Request is canceled, if you drill into the details, the message now reflects that it has been canceled.
<b>WISEstaff:</b> Added FTE to Assignment Dynamic Questions configuration	We had a number of assignments in the UI that were displaying FTE when they shouldn't. To prevent similar issues next year we are making FTE questions for each assignment configurable by the DPI admin who sets up the codes each year.
<b>WISEstaff:</b> PDF report printing out blank pages every other page	On the All Staff Report if you exported to PDF, every other page was blank. We fixed this issue.
<b>WISEstaff:</b> Made Contacts and contact validation Year Based	We have made the Contacts, so they can be filled out for next year before we switch the entire WISEstaff tab to next year. 17-18 Contacts will open July 1st this year.
<b>WISEstaff:</b> Contract UI - Local and Total experience allows entry up to 99 years.	The Contract UI now allows entry of Local and Total Experience up to 99 years. A bug was preventing entry over 50 years.
<b>WISEstaff:</b> Added a new description on Manage Position Area UI	We will be storing and displaying a new description that is assignment specific for end users. Previously we only separate descriptions for Position and Areas.
<b>WISEstaff:</b> Removed Info Validations Status Messages from the home page	We removed a message on the WISEstaff home page when there are outstanding Info messages in the last Validate Staff Data run. The same info is now displayed

	on the Staff Home page Annual Staff Collection Roadmap.
<b>WISEstaff:</b> Changed Details Column title to read "Assignment Related Questions"	The assignment-related questions are questions that turn on/off depending on assignment code. We have standardized the UI to say "Assignment Related Questions". We will start referring to them as such in conversations and documentation.
<b>WISEstaff:</b> Bug Fix-- Validation 4034 no longer showing across agencies.	When a staff member didn't require a license Entity ID for the assignment(s) in your hiring agency but did for another hiring agency, this would show up in your 4034 warnings. We told users just to acknowledge them as a workaround. However, a bug would reset the acknowledgement. To fix this, we now corrected the original 4034 warning, so it only shows up in your hiring agency if your hiring agency has an assignment requiring a license.
<b>WISEstaff:</b> Roadmap external links has a new tab and increased title fonts.	We made the phase titles of the roadmap and the "i" info icon larger and clearer. Also, the link for "Review Assignment Code Changes" opens to a new tab since it's an external web link to the application.
