

**Release Notes for 5/4/2017 WISEid/WISEstaff Production Release
(Core Apps Team Sprint 134 2-Week Work Cycle)**

| Feature Title | Notes |
|--|---|
| WISEid: Next year's agencies can access WISEid before next year. | Next year's new agencies can get into WISEid now, but they still can't perform Person Uploads or add Local Person IDs. Future work will fix these issues by the end of May 2017. |
| WISEid: Merge Report by district shows WISEid merges. | Under Reports/Validations, a new report has been included called "Merge Report". This report allows users to query merges by request date for the selected agency where the merge records have a Local Person ID for that agency. This list should be reviewed for any merges that affect WISEids in your agency as persons in your agency may have new WISEids. This is particularly important for Assessment system updates in your agency. |
| WISEstaff: Enter Aggregate Staff FTE now allows multiple contracts per school. | For 2017-18 we will now allow multiple aggregate staff FTE records per school for the same assignment code in cases where there are multiple vendors. |
| WISEstaff: Hotfix-- Removed corrupted Local Person IDs | We removed a small number of Local Person IDs that were corrupted, as they were attached to non-active WISEids. They would be blocked from being added to new WISEids as if the Local Person ID did exist. |
| WISEstaff: Added After Certification Phase step to the Roadmap & rearranged boxes | On the WISEstaff home page for the Annual Staff Collection Roadmap, we added a new step 'After Certification Phase' and rearranged the roadmap phase boxes for better visual presentation. |
| WISEstaff: Fixed performance on Home Page | For large districts the WISEstaff Homepage would take up to 30 seconds to load because the dashboard graphs took that long to load. Now we load home page |

| | |
|--|---|
| | immediately and load dashboard graphs as data is computed for better performance. |
