

## Release Notes for 05/18/2021 WISEid/WISEstaff Production Release

Feature Title	Notes
<b>WISEid:</b> Mask potential SSN removals Person Change History	Added security functionality to mask in the Person Change History if the Local Person ID is in SSN format - either old or new value.. This is in case someone adds a SSN and then removes it so there is no chance of it being found by looking through Person Change History. Instead of showing the number it will say "Masked possible SSN". A reminder as always SSNs should never be entered into WISEid.
