

Release Notes for 07/15/2021 WISEid/WISEstaff Production Release

Feature Title	Notes
<p>WISEid: Show message when person upload generates Change Requests</p>	<p>We now show a pop-up message on View Upload Results when the most recently dated person file upload contains 1 or more Change Requests. Message text is dynamic based on the type of Person Upload - staff, student or both. Message text "Your most recent file upload created one or more (STUDENT / STAFF) change requests that may require entry of comments to be approved. Click on the number in the Pending Change Requests column to view details. Add comments to each new change request to explain the need for the change."</p>
<p>WISEid: Update Change Request count on View Upload Results page</p>	<p>On the View Upload Results page we converted the "Change Request" column to "Pending Change Requests". The count now only shows those change requests either in Pending or Appeal Pending status since they are the only ones that are not processed yet.</p>
<p>WISEid: Allow Admin user to enter comments when mass canceling CRs</p>	<p>If you need to cancel change requests en masse because of a bad upload or data issue you can submit a case to DPI CST and they now perform a mass cancelation.</p>
<p>WISEid: Agency is redacted on Change Request page when it shouldn't be</p>	<p>Fixed cases on the Change Request page where the Requesting Agency</p>

	said "Agency Redacted" when it shouldn't have been.
