

Release Notes for 11/21/2019 WISEid/WISEstaff Production Release

Feature Title	Notes
WISEstaff: Adjust rules for validation warning code 5900	Warning validation code 5900 was mistakenly generated for all districts, advising that assignment code 53-9002 for college faculty required a background check application. All erroneous 5900 warnings have been cleared as of Nov 21.
WISEstaff: Remove Aggregate Staff FTE limit	The 200 FTE limit for a single Aggregate FTE assignment has been removed to assist large districts who contract district-wide.
WISEstaff: Separate Data Validation Reports into individual reports	The previous Data Validation Reports screen has been removed and replaced with links to the individual reports previously contained within that page. Links for Admin Salary/Fringe and Salary/Fringe Variance can be found in the Reports menu.
WISEstaff: Delete premature certifications	The preliminary certification window was opened prematurely, allowing districts to certify their data. Those certifications have been deleted and districts must recertify after it opens on Dec 5.
WISEid: Modify Entity ID update job to match on Local Person ID	The system job that verified new Entity IDs previously required the entry of an assignment in order to match. Since Entity IDs may be entered before assignments are, we have removed that requirement and will complete the

	match if the person has a Local Person ID for the district adding the Entity ID.
