

**Release Notes for 1/29/2019 WISEid/WISEstaff
Production Release
(Core Apps Team Sprint 177 2-Week Work Cycle)**

| Feature Title | Notes |
|---|---|
| WISEid: Bug Fix--Can search by birth date timestamp | We had an issue when if a user was searching by a person's name plus birth date, drilled into the person and then returned to search results, the user would receive an error for birth date because it added a timestamp to the birth date in the search field. This issue was resolved. |
| WISEid: Bug Fix--Search Results bookmark works. | We fixed an issue when a user would search, select a person, then click the Search Results breadcrumb, it should take the user back to the search results. Instead, it gave me a blank error page, but is no longer the case. |
| WISEstaff: Added Area filter to All Staff Report | We added an Assignment Area filter to the All Staff Report that can be used with Position filter to filter for specific assignment codes. |
| WISEstaff: Added collapsible chevron to Checklist sections | When an Annual Staff Collection Checklist step has passed and/or you have all green checkmarks, the step section will auto-collapse for you using the right chevron down arrow. You can expand using the same chevron. |
| WISEstaff: Changed ELO download column name | We changed the label for Local ID in the Licensing Look-up/Download to Local Person ID to match what it is. |

|--|--|
| <p>WISEstaff: Bug Fix--All Staff Report has Local Person IDs (when staff person doesn't have assignment loaded)</p> | <p>Previously we had an issue in the All Staff Report when an agency didn't have an assignment loaded for a person, but the Local Person ID would disappear. We resolved this issue.</p> |
| <p>WISEstaff: Bug Fix--Fixed CMO All Staff Report and Staff Corrections Form</p> | <p>We fixed both the All Staff Report and the Staff Collections Reports to work for CMOs.</p> |
| <p>WISEstaff: Hotfix--Validations 4054 4055 4056 4057 now working properly</p> | <p>We fixed an issue where Local and Total Experience warnings were not generating correctly.</p> |
| <p>WISEstaff: Hotfix--Validations 4108 and 4430 are available when applicable.</p> | <p>Validations 4108 "Required Highest Degree doesn't match between agencies: [Insert agency names here]." and 4430 "Required Total Experience doesn't match between agencies: [Insert agency names here]." were not functioning. We fixed the validation logic, so they throw as expected.</p> |
| <p>WISEstaff: Increased character limit on ELO Download search field</p> | <p>On Licensing Look-up feature, we increased the max characters allowed in the search field to 300,000 for Entity ID, WISEid, and Local Person ID search types.</p> |
| <p>WISEstaff: Locked Certification Date after the window closes</p> | <p>Once the certification window date passes and a district has certified, they will no longer be able to uncheck 'certify'. This made our records of completion over time incorrect in year over year comparisons.</p> |
| <p>WISEstaff: Bug Fix--Salary Report Download link works with filter selections.</p> | <p>We fixed the download for the Salary Report that would break when a filter was applied.</p> |

| | |
|--|---|
| <p>WISEstaff: Display Roster info from WISEdata current year on Staff Edit page</p> | <p>Now you can view the current year's WISEdata Roster sections for a teacher on the Staff Edit page. This should help in determining the correct assignments for a person.</p> |
| <p>WISEstaff: Updated Staff Salary and Fringe Benefit Variance Report</p> | <p>We changed filter checkboxes on the Salary and Fringe Benefit Variance Report. We added red highlighting to cells that meet filter requirement results for potentially incorrect data.</p> |
