

**Release Notes for 2/21/2019 WISEid/WISEstaff  
Production Release  
(Core Apps Team Sprint 179 2-Week Work Cycle)**

<b>Feature Title</b>	<b>Notes</b>
<b>WISEid:</b> Hotfix--Name changes now coming up in search and Review Matches	We found and fixed around 1k person's updated names not coming up in WISEid searches. This resulted in certain records going to Match Review over and over again. It also led to WISEstaff Contract errors for mismatched names, but this has all been resolved.
<b>WISEid/WISEstaff:</b> Bug Fix--Notification New Potential Matches student/staff filter now working	We fixed an issue when users click a link in the New Potential Matches Notification, the Review Matches page filters correctly for Staff or Student Local Person ID records.
<b>WISEid:</b> Added columns to Resolve Duplicates screen	We enhanced the Resolve Duplicates screen for DPI when processing Potential Duplicates. We made it so DPI can assign each Potential Duplicate to a specific DPI Customer Support Team member, which will speed up the resolution process for customers.
<b>WISEid:</b> Added 'New Comments' filter to Change Request page	We added a New Comments filter to the Message and Change Request page. It will filter for only records with new, unread comments for your agency. This will also be used in the Notification for New Change Request Comments to limit results when clicking the notification. This feature should make it easier for users to

	<p>detect notifications and save about ten minutes of investigation time each time working on Change Requests.</p>
<p><b>WISEid:</b> Bug Fix--Adjusted filter types on Notification Rules admin</p>	<p>We fixed the notifications so they limit screens that they link to in order to match the notification description. This will only be for new Notifications generated after this release. Again, this will make the notifications easier for users to understand and quicker to know what needs attention.</p>
<p><b>WISEid:</b> Change Request Type options on Results page for notification filter</p>	<p>On the Results screen, we modified the filter, so you can filter by Request Type of: Person-Student or Person-Staff. These filters use the Local Person ID Type from the upload to determine if it's staff and/or student. These filters are also used for the 'File Upload has Errors' notifications. This additional feature should save users a couple minutes during each time checking notifications for results.</p>
<p><b>WISEid:</b> Bug Fix--Upload &amp; API create Entity ID change request for new Person</p>	<p>We fixed the logic for if new Entity IDs are provided via Person Upload or Ed-Fi Identity API so that they generate Change Requests for DPI to review.</p>
<p><b>WISEstaff:</b> Added Research ID to Public Reports</p>	<p>In the Public All Staff Report download (only), we added a Research ID. Research ID is a number unique per person and on all records in the Public Staff Report data. This was added for researchers to easily track records for the same person over time. This is NOT the WISEid. Note, the Research ID could change if WISEids are merged.</p>

<p><b>WISEstaff:</b> Bug Fix--Missing Entity ID notification links to proper location.</p>	<p>We modified the notification for 'Entity IDs are Missing' to only trigger when there is not an acknowledged Warning in Validate Staff Data. We also fixed the link, so it opens a report of only those missing Entity IDs but not having an acknowledged warning.</p>
<p><b>WISEstaff:</b> Bug Fix--Staff Salary and Fringe Benefit Variance Report FTE sums work.</p>	<p>We fixed an issue with FTE sums not working when the hiring and working agencies were not the same.</p>
