

**Release Notes for 2/7/2019 WISEid/WISEstaff
Production Release
(Core Apps Team Sprint 178 2-Week Work Cycle)**

Feature Title	Notes
WISEid & WISEstaff: Updated footer showing Superintendent's name	We updated the footer in the applications for the new DPI State Superintendent Carolyn Stanford Taylor.
WISEid & WISEstaff: Bug Fix--Fixed access for CESA roles	We fixed the security access so that CESA WISEsupport reps can have Read-only access to Results and Validate Staff Data pages.
WISEid: Hotfix--Notification Job works correctly.	We fixed the Notification job, so emails will go out when district users subscribe.
WISEstaff: Added previous years' contracts and assignments to WISEstaff person record	We added sections on the bottom of the Staff Edit page for previous years' Previous Years' Assignment Details (info only) AND Previous Years' Contract Details (info only). This shows the previous two years of history if they exist statewide. This should help users evaluate the accuracy of Local and Total Experience warnings.
