

**Release Notes for 3/18/2019 WISEid/WISEstaff  
Production Release  
(Core Apps Team Sprint 181 2-Week Work Cycle)**

<b>Feature Title</b>	<b>Notes</b>
<b>WISEid:</b> Revised New Change Request Status rules and filters	We changed the New Change Request Status so that it focuses only on the Change Requests that require action. The new name is Change Request Action Needed. Now when a request is generated, it will take users to the Message and Change Request page and filter for only the Action Needed Change Requests. This will save users a few minutes of time filtering for the work to complete instead of searching through non-action items.
<b>WISEid:</b> Notification - moved day of week section for email opt-in	On the Agency Notifications page, we modified the location to opt into notifications for particular days of the week. It is now a selection at the top per email address rather than per notification type.  This change also resolved a bug with this process when users changed their options after their original opt-in.
<b>WISEstaff Public Reports:</b> Bug Fix-- Public Administrative Salary Report filter for position now working appropriately	On the Public Staff Report-- Administrative Salary Report, we fixed the broken Position filter drop down.
<b>WISEstaff:</b> Allow new Entity IDs after the final snapshot and before the final audit	We added logic to use Entity IDs in the final audit when Entity IDs are applied after the final snapshot but before data is taken in mid-June for the final audit. This will allow the audit to capture

	<p>educator records for review that may have previously fallen through the cracks, ensuring higher quality data and accurate licensing.</p>
<p><b>WISEstaff:</b> Bug Fix--Assignments on deactivated WISEids are not being counted in reports</p>	<p>Previously, we had an issue with the FTE Summary Report and Staff Dashboard Assignment Count bar chart showing merged WISEid records which had been replaced, but this was resolved to display proper counts.</p>
<p><b>WISEstaff:</b> Added Area filter to Staff Corrections Form</p>	<p>We added an Assignment Area filter to the Staff Correction Form report so users can filter by the complete assignment code. This enhancement will save users a couple minutes of time filtering for the right data.</p>
<p><b>WISEstaff:</b> Added Sort feature to Validate Staff Data</p>	<p>We added the ability to sort the columns of Type and Classification. This new sorting feature helps users review their data in an easier fashion, saving several minutes of time and providing a clearer picture of the state of their staff data.</p>
