Release Notes for 3/19/2020 WISEid/WISEstaff Production Release

Feature Title	Notes
WISEid/WISEstaff: The WISEid district user role was granting access to WISEstaff when it should have allowed only WISEid access	Closed the gap where if you had WISEid access and not WISEstaff you could read some parts of WISEstaff
WISEstaff bug: Dashboard tiles were showing red alerts even though threshold wasn't met	Fixed the Data Quality Dashboard and Certify Data pages so that red alerts are correctly highlighted only when thresholds are exceeded
WISEstaff: High/Low Grades not populating correctly in preliminary snapshot	Fixed a bug affecting CESAs where grades were not reported correctly to the audit system. Thus they failed the preliminary audit when they shouldn't have.
