

**Release Notes for 3/7/2019 WISEid/WISEstaff
Production Release
(Core Apps Team Sprint 180 2-Week Work Cycle)**

Feature Title	Notes
<p>WISEstaff: Improvements to Admin Salary Fringe Report</p>	<p>On Data Quality Report - Admin Salary Fringe Report:</p> <ul style="list-style-type: none"> -Added a filter for hiring agency, so a user can decide to run by a specific hiring agency or work agency or a combination of both hiring and working agency filters -Changed report so assignments are expanded by default -Added hiring and working agency to grid and download -Made it so when the report is running, the spinner icon appears from the beginning until completion -Changed dropdown for multiple schools to default to all schools without showing all schools, which removes screen clutter <p>All of these new features should make it easier for WISEstaff users to submit and review their data.</p>
<p>WISEstaff: FTE Summary Report can be run by Working or Hiring Agency</p>	<p>On the FTE Summary Report:</p> <ul style="list-style-type: none"> -Added filters for working and hiring agencies -Added Clear button to reset filters <p>These additions will save users up to a half hour of time each in reviewing the report for data quality.</p>

WISEstaff: Changed Error 5700 for over 1.5 FTE statewide to be a Warning with Comments

We changed Error 5700 from an error to a warning with comments for cases when multiple districts submitting the same person with FTE that adds up to over 1.5. If staff really do have over 1.5 FTE or you can't get another district to remove inaccurate data, you can acknowledge the warning and provide either a canned comment of typical reasons or your own custom comments.
