

Release Notes for 4/14/2020 WISEid/WISEstaff Production Release

| Feature Title | Notes |
|---|---|
| <p>WISEid: District Specific Local Person ID WISEdata to WISEid job</p> | <p>Deployed a new job that runs at 9:30 PM each night that applies any new Student Type Local Person IDs of any enrollment type processed by WISEdata Ed-Fi ODS for the current collection year. Also updates email changes for the Local Person IDs.</p> |
| <p>WISEid: Fix for Infinite Campus districts using WISEid as the Student Local Person ID</p> | <p>To resolve an issue with Infinite Campus (IC), we have adjusted our WISEdata to WISEid Student Sync job to ignore any cases of Local Person ID being the same as the person's WISEid. We also have adjusted our jobs to ignore and delete cases where Student type Local Person IDs = WISEid number. IC customers should get the IC update when possible to not allow these to come through Ed-Fi. For IC customers, the WISEid system's Local Person ID should always be the Student/Staff number for your district for that person and not the WISEid nor the IC Person ID. We will be contacting those who used Local Person ID = IC Person ID to reset all their student type Local Person IDs in WISEid. Those IC users who had Local Person ID = WISEid do not need to do anything other than apply the IC update that changes the system to always use Local Person ID = Student/Staff Number. This update also fixed Local Person ID</p> |
