Release Notes for 4/16/2019 WISEid/WISEstaff Production Release
(Core Apps Team Sprint 183 2-Week Work Cycle)

Feature Title	Notes
WISEid: Bug Fix--Local Person ID allows for delete and then cancel	We had an issue when if you select to delete a Local Person ID but then click cancel, it would start a spinner that never stopped. This issue was fixed.
WISEid: File Upload has Errors - Student Data no longer generating falsely	We changed the Notification for File Upload has Errors so that it doesn't count errors that don't prevent the row from being uploaded. From 4/17/19 on, if you receive this notification, it should only be if you have errors in the Error counter on the Results page.
WISEid: Bug Fix--UI Person Edit works for Other Name and Guardian Suffix	Previously, we had an issue when if you tried to edit Other Name and Guardian suffixes at the same time on the Edit Person page, it would not show the suffix list. This issue was resolved.
WISEid: Continue to add Multiple Birth Status to product	We are continuing to work on features for Multiple Birth indicator (twins+) that will be hidden until the June release. Vendors can test them in May on Vendor UAT site. Specs going out to vendors next week.
