Release Notes for 4/2/2020 WISEid/WISEstaff Production Release

Feature Title	Notes
WISEid: Updated to handle multiple user accounts on the same computer	Fixed an issue in WISEid/WISEstaff: if you had multiple users accessing multiple districts on the same computer there would be session issues when you changed agencies.
WISEstaff: Prevent user from running licensing download with an expiration filter selected but no date selected	Adjusted the License Download page filters so if you select "Filter by Background Check Expiration" or "Filter by License Expiration Date" you must pick a year to download the results. Also includes a new Clear Optional Filter button to remove your selection if you decide not to filter the results.
