Release Notes for 5/31/2018 WISEid/WISEstaff Production Release
(Core Apps Team Sprint 160 2-Week Work Cycle)

Feature Title	Notes
WISEid: Person Upload Gender Change Request now works even when missing Parent/Guardian info.	We fixed a Person record upload issue where if you changed the gender when the Parent/Guardian info was null (missing), the Change Request for gender was not created if another district had a Local Person ID.
WISEid: Hotfix--Appealed Change Request approval applies changes	Previously, when DPI approved a Change Request that had been appealed, the changes didn't actually take place as they should have. This has been resolved.
WISEid: New validation message for Person Edit UI for missing Parent/Guardian when adding Local Person ID	We had an issue where if you attempted to add a student Local Person ID to a person who was missing a Parent/Guardian, there was supposed to be a message in the User Interface (UI) that would tell the user that the Local Person ID can't be created until a Parent/Guardian exists. Instead, nothing happened when you clicked Update. This was fixed, and now message 6455 displays correctly.
