

Release Notes for 5/12/2020 WISEid/WISEstaff Production Release

Feature Title	Notes
WISEid & WISEstaff: Change label for 'Secure Home' to 'WISEhome'	The link from the DPI logo in the upper left corner of the site and in the user name drop-down menu now goes to the new DPI WISEhome site as part of the WISEsecure changes.
WISEid: WISEdata to WISEid Student Sync job - ignore changes to null suffix	Create a temporary workaround that ignores changes of the suffix from a value to NULL in the WISEdata to WISE Student Sync job. This is a workaround for Infinite Campus (IC) and some smaller vendors where they aren't sending suffixes via Ed-Fi and thus we are falsing seeing them as removed on our end. This fix is only for the 2019-2020 school year and will be reversed for 2020-2021 when we have test cases to verify all vendors are sending suffixes via Ed-Fi when they exist in the SIS for students.
WISEstaff: Public Students to FTE Staff Ratio Report	Replaces SDPR report data that was decommissioned recently. The Public Ratio of Students to FTE Staff Report provides student-to-staff ratio data. Report summary: Student data is based on enrollments as of the Third Friday of September and staff data is presented as full-time equivalency (FTE) by working agency and staff position classification. Also available is a downloadable report School Teacher

	<p>Details Report showing school-level FTE by course subject area for Teacher and Speech/Language Pathologist positions. In the near future we plan to add FTE summaries rolled up to the district level as well.</p>
