

**Release Notes for 5/28/2019 WISEid/WISEstaff**  
**Production Release**  
**(Core Apps Team Sprint 185 & 186 2-Week Work Cycles)**

Feature Title	Notes
<p><b>WISEid:</b> Added Multiple Birth field to miscellaneous areas in the UI</p>	<p>We added a new Multiple Birth field to User Interface screens in WISEid. This feature will be turned on 6/10/19. It will save users time in trying to identify twins, triplets, etc. versus siblings with similar names or different people entirely when reviewing potential matches.</p>
<p><b>WISEid:</b> Bug Fix--Resolved Person Change History suffix issue</p>	<p>We had an issue in the Person Change History when if a suffix was changed, it incorrectly showed the current value as the previous value and vice versa for showing changes. This issue was fixed.</p>
<p><b>WISEid:</b> Removed Born Outside of US indicator from download files</p>	<p>We removed Born Outside of US from the download files of Student Download by Local Person ID and Staff Download by Local Person ID. This change will take effect 6/10/19.</p>
<p><b>WISEid:</b> Removed No Location Release field from person downloads</p>	<p>We removed the No Location Release column from the following downloads:</p> <ul style="list-style-type: none"> <li>○ Student Download by Local Person ID</li> <li>○ Staff Download by Local Person ID</li> <li>○ WISEid Person Upload Results Download</li> <li>○ WISEid Transaction History Download</li> </ul>

	<ul style="list-style-type: none"> <li>○ WISEid Person Upload Results Error Download</li> <li>○ Upload - sample Person template</li> </ul> <p>This change will take effect 6/10/19.</p>
<p><b>WISEid:</b> Removed No Location Release validation errors</p>	<p>Because we are removing all the No Location Release indicators, we are also removing all No Location Release-related validation errors.</p>
<p><b>WISEid:</b> Modified logic for match review of Multiple Birth in upload</p>	<p>We altered our Upload Match Review Logic for Multiple Birth. If you upload a person with Multiple Birth = Y, the row will always go to Match Review. This will help reduce confusion around twins, triplets, etc. and help prevent accidental matches to siblings with similar names.</p> <p>If you work the first match of a twin, you may not have any values with which to match. If that is the case, select the option to create a new WISEid. In the future, we will add a message to make it more clear that nothing is wrong and simply providing information to you.</p>
<p><b>WISEid:</b> Removed No Location Release from Person Upload</p>	<p>We removed No Location Release from the Person Upload. This change will take effect 6/10/19.</p>
