

**Release Notes for 7/26/2018 WISEid/WISEstaff  
Production Release  
(Core Apps Team Sprint 165 2-Week Work Cycle)**

<b>Feature Title</b>	<b>Notes</b>
<b>WISEid:</b> Applied new error codes to invalid character validation messages	<p>We fixed the issue that six Level 1 person upload errors were missing code numbers. They include:</p> <ul style="list-style-type: none"> <li>● 3020 - First Name contains invalid characters</li> <li>● 3021 - Middle Name contains invalid characters</li> <li>● 3022 - Last Name contains invalid characters</li> <li>● 3023 - Other Name First Name contains invalid characters</li> <li>● 3024 - Other Name Middle Name contains invalid characters</li> <li>● 3025 - Other Name Last Name contains invalid characters</li> </ul>
<b>WISEid:</b> Hid WISEsecure Role in UI	<p>The WISEsecure system isn't ready to roll out yet, so we have hidden the field behind a toggle in WISEid in the UI. It still remains in uploads and downloads.</p>
<b>WISEid:</b> Hotfix--Resolved invalid email error when email had capital letter in upload	<p>We has an issue during Person Uploads when email addresses contained capital letters, we mistakenly stopped email as having invalid characters. This has been resolved.</p>
<b>WISEid:</b> Resolved No Location Release Person Upload update issues	<p>We fixed an issue where as the DPI role, the No Location Release field didn't update correctly.</p>

**WISEstaff:** Audit Results reports in .csv format

We added a new CSV (Excel) download via an icon on the Audit Results page for each report. This is in addition to the existing PDF version starting with 2017-18 Final Audit results only.
