

**Release Notes for 9/20/2018 WISEid/WISEstaff
Production Release
(Core Apps Team Sprint 167, 168, and 169 2-Week Work
Cycles)**

Feature Title	Notes
WISEid: Added 'Appeal Denied' status for Change Requests	We changed the Change Request statuses to have two appealed statuses. "Appeal Denied" means it has been appealed, but DPI denied the appeal. "Appeal Pending" means means it has been appealed by the district agency, but DPI has yet to decide if they will deny or approve.
WISEid: Added internal comments to Resolve Duplicates admin screen	DPI will now be able to keep a log of comments on any potential duplicate WISEid pairs that have been submitted for review. Eventually we will make this viewable to end users.
WISEid: Added Enrollment and Birth Location info to Potential Match Review page	On Potential/Review Match screens, all users will be able to see birth location information. Only users who also have a WISEdata Portal user role will be able to review Enrollment info. Enrollment info includes the last two enrollments for a person. Not having to log into WISEdata Portal to review enrollment data for a student should save each user 15-30 minutes each week.
WISEid: Added Enrollment and Birth Location info to Search Results Details	On the Search Result screens, all users will be able to see birth location information. Only users who also have a WISEdata Portal user role will be able

	<p>to review Enrollment info. Enrollment info includes the last two enrollments for a person. Not having to log into WISEdata Portal to review enrollment data for a student should save each user 15-30 minutes each week.</p>
<p>WISEid: Bug Fix--Added Other Name Upload validation for incomplete Other Names</p>	<p>We had an issue that when only partial other names were provided, the error didn't specifically indicate why the row errored, but this was fixed.</p>
<p>WISEid: Bug Fix--Added timeout message at 20 minutes to fix stalled sessions</p>	<p>We fixed the issue where some users were losing their permissions in the system after very long uploads.</p>
<p>WISEid: Bug Fix--Applied changes to new record during Potential Match</p>	<p>We fixed issues that when having a potential match and choosing a new record to be created the following fields were not updating:</p> <ul style="list-style-type: none"> ● Birth Location information (Birth City, County, State, Country) ● Parent/Guardian information ● Email Address under Local Person ID ● WISEsecure Role under Local Person ID ● No Location Release flag <p>We still have some fields not updating in cases of choosing a potential match, which we will fix in the near future.</p>
<p>WISEid: Bug Fix--Fixed Message and Change Request paging and record counts</p>	<p>We had an issue where paging on the Message and Change Request screen wasn't working properly for districts. This issue was resolved. Also, very</p>

	rarely some records were omitted, but they are now visible.
WISEid: Bug Fix--Revised logic for Parent/Guardian Upload modifications	We fixed the remaining issue where similar parent/guardian middle names weren't ignored (e.g., Mary Q. Smith vs. Mary Q Smith).
WISEstaff: Changed Local Assignment Title max characters to 255	We changed WISEstaff Assignments in the User Interface (UI) and Upload so that Local Assignment Title supports up to 255 characters. We recommend if you have multiple local assignment titles per assignment for a person and school that you put either ";" or " " in between each in the field to separate them.
WISEstaff: Changed Local Assignment Title to required field	We are now enforcing the requirement that Local Assignment Title is submitted during the upload of Assignment or during a UI Edit.
WISEstaff: Ignore leading zeros in Entity ID and Local ID fields on upload	We will ignore differences in the Entity ID in the Person Upload when the difference between what we have in WISEid and the new value are only leading zeros. We will not update records if that is the only difference and will not give error messages about a mismatch.
WISEstaff: Modified Assignment UI Subcontracted question text	We modified the subcontracted question to also include RCC. The question now reads: "Is this assignment being performed by a subcontracted individual or a teacher of RCC public school students?"
