Release Notes for 9/30/2020 WISEid/WISEstaff Production Release

Feature Title	Notes
WISEid: Prevent denied change requests from being applied	We fixed a problem for 63 cases where if an active Change Request was not finalized and another Person upload was done that affected the same WISEid record, the system could apply a denied Change Request. We also manually reversed the changes that shouldn't have happened and DPI CST investigated and resolved a small number of persons needing a new WISEid.
WISEid: Person upload fails when birth date is invalid	Fixed an issue where birth dates with invalid birth years would break the Person Upload. Using an incorrect birth year of 15 AD was the issue for one district.
WISEid: Only show a person's Local Person email address to users of the same Local Person agency	For privacy reasons we are now preventing the viewing of email addresses attached to Local Person IDs to agencies outside of the person's own associated agency.
WISEstaff: Final Assignment 2020-21 code changes are in place	All assignment changes have been configured. You can view the latest assignment list in the Assignment Code List in the Resources menu within WISEstaff. If you want more details on what has changed see our [vendor documentation]().
