WISEdata Release Notes: 7/20/17

WORK ITEM	Description/Comments
API: Added Section 504 program	We added a Section 504 program association for students submitted in 2017-18 data.
API: 2017-18 Language Types accepted	We updated the Language Type table in our database for the new 2017-18 language values.
DB: Update to DBA permissions	There was an update to have a database administrator now have control of permissions for WDP, Ed-Fi, and the Collections database.
DB: Bug Fix--Modified WI DPI Extension Program Schedule	The WI DPI Extension Program schedule didn't have an Is Active value, so it wasn't able to be deleted if a user removed the value. This has been fixed.
WDP: Rule 6393 has improved performance.	The L2 validation rule "6393" now runs faster for MPS for improved performance.
WDP: Rule 6396 has improved performance.	The L2 validation rule "6396" now runs faster for MPS for improved performance.
WDP: Bug Fix--Rule 6569 now works appropriately.	The L2 validation rule "6569" - Cst Yes In District was failing in PROD for MPS because it was timing out in the calculations. This has been resolved.
Discipline: New rule 6673	We have a new L2 validation rule "6673" - Student discipline records should not be reported.
Discipline: New rule 6679	We have a new L2 validation "6679" - Required field is missing, 'Serious Bodily Injury'.
Discipline: New rule 6680	We have a new L2 validation rule "6680" - Zero days removed with the current term (action length) reported for suspension or IAES removal.
Discipline: New rule 6681	We now have an L2 validation rule "6681" - Invalid Length for Out of School Suspension.
Discipline: Bug Fix--6686 now throws appropriately.	For conditions when Length was present but 'Actual Discipline Action Length' was Null, Blank, or Missing, validation 6686 wasn't showing up.

	This has been fixed.
WDP: Rule 6582 is validating faster now.	The L2 - Validation 6582: Invalid Grade Range For Next School Year was taking a very long time to load, but it's working now.
API: sSEPA Last Evaluation Date field is now available for 2017-18 records.	We enabled/activated the field for Last Evaluation Date to a sSEPA for 2017-18 special education records.
WDP/API: Special education profiles show the new School ID and Last Evaluation Date properties.	API Profiles that expose special education and Student program association data are updated to show the new School ID and Last Evaluation Date (sSEPA only) properties. You can now see these values in the WISEdata Portal for sSEPA and sPA views.
API/DB: School ID was added to the Ed-Fi API and databases.	The School ID extension property was added to the Student Program Association tables in the Ed-Fi API and Collections databases beginning with 2017-18 data. This is needed for sSEPA and Section 504 sPA.
WDP: 'Attendance Rate by Grade and Disability Status' graph in WISEdata for the Attendance collection now populating students with disabilities correctly	The 'Attendance Rate by Grade and Disability Status' graph in WISEdata for the Attendance collection wasn't populating the students with disabilities correctly, but this is working now.
WDP: Bug Fix--Contact Acknowledgment now working for 2017 and 2018	When a user was logging in without an Admin Role and did not have any contacts for that Agency, the system wasn't redirecting to the Contact page for 2017 and 2018, but this has been resolved.
Discipline: Bug Fix--Blank fields appear as N/A.	We made changes so that if Modified Term and Early Reinstatement fields are blank, it will display "N/A" consistently like other fields.
WDP: Bug Fix--The Queue Validation button will check data for multiple active years.	The 'Queue Validation' button has now been configured to run for multiple active years.
WDP: Bug Fix--Validation Message Search filter is now working.	The "Validation Message" Search filter was not working occasionally, but it's been fixed.
DB: Obsolete sSA reference code removed	We removed the now obsolete sSA reference code from the sSEPA endpoint and database objects to avoid confusion.

WDP: The Data Stats panel works better.	WDP was slowing down with a Student Detail load, so we fixed the Data Stats panel to work faster when loading.
WDP: Calculations modified to reflect changes made and the date modified	We modified calculations to only update where there were changes and then to update DPI Calc Modified Date.
