

WISEdata Release Notes: 1/31/17

WORK ITEM	Description/Comments
<p>API/EdCred: New Profiles for special ed-only vendors and SIS vendors that shouldn't be sending special ed data</p>	<p>We added profiles to make sure two different vendors (SIS and a specialty vendor) can't both create, update, and delete special ed data and unknowingly affect the other's changes.</p>
<p>Validation: Resolved issues with Error 6375</p>	<p>Fixed bug with 6375. It no longer throws this error for students who do not have multiple enrollments or schools or for student who aren't enrolled in multiple agencies or schools.</p>
<p>Validation: 6614 now checks for IsPrimary = 1.</p>	<p>Fixed bug with 6614 where the rule wasn't checking to see if the primary school was marked as Yes, True. Now it verifies the primary school is marked as Yes.</p>
<p>Validation: Resolved issues where PPP students with Count Date Inclusion = Y were still appearing in 3rd Friday count</p>	<p>Certain PPP children were appearing on the 3rd Friday of September Enrollment metric because Count Date Inclusion was set to YES, and the rule wasn't accounting for the PPP status.</p>
<p>Validation: State school students no longer receive 6653 Warning message.</p>	<p>6653 Warning Message had been throwing for Department of Health Services Schools using Environment codes related to Public Residential Facilities, but State school students should not receive it anymore.</p>
<p>Validation: 6572 error message no longer displays for students who belong to a different agency.</p>	<p>6572 Error Message was displaying for a student, but no student name or details were listed and the student was not even present in that agency. Error 6572 will no longer accidentally throw for students at a different agency.</p>
<p>Validation: Resolved bug with 6626 info not making it out of Ed-Fi to WISEdata</p>	<p>6626 Import was not running to move data from Ed-Fi to Collection in WISEdata, but it works now.</p>
<p>ARM: You can now update Limited English Proficiency values in the ARM.</p>	<p>When trying to use the ARM to update Limited English Proficiency values, it wasn't working but is now resolved.</p>

<p>WDP: You will no longer see the “Too many redirects” message on the Acknowledgement screen.</p>	<p>The Contact Acknowledgement screen was showing a "Too many Redirects" message when entering WDP, but it's been fixed.</p>
<p>WDP: If you have saved Contact/Acknowledgement info, you will be able to log in and work as usual.</p>	<p>The Contacts/Acknowledgement screen was prompting users even though they already saved data for this, but it will no longer ask you if you have saved info for this already.</p>
<p>WDP: You can see when your specific agency's last validation was run.</p>	<p>There is now more clarity for Last Validation Run stats. You can see All Agency time, as well as your specific Agency Run.</p>
<p>WDP: Resolved an issue with the system not checking if the Student Characteristics is marked active</p>	<p>The student characteristics on the Student Details Screen wasn't checking isActive, but it's fixed.</p>
<p>WDP: Student Detail screen has Expected Transfer Field.</p>	<p>The Expected Transfer field was missing from the Student Detail screen but now appears.</p>
<p>WDP: Student Error Rate Donut is red to reflect errors.</p>	<p>Student Error Rate Donut Chart - Students with Errors donut was showing as a green color, which was misleading, but it is now red for errors.</p>
