

WISEdata Release Notes: 3/2/17

WORK ITEM	Description/Comments
WDP: Bug Fix-- Fixed 6597 to use the most recent sSEPA, so the error only throws as it should.	Error 6597 wasn't looking at the most recent sSEPA, so it was throwing incorrectly for records. This now looks to the most recent sSEPA and will only throw when it should.
WDP: Bug Fix-- All districts' TFS and Oct. 1 count calculations should be running properly.	Certain districts were having issues with student count calculations. The bug is fixed, and now all district count calculations are functioning.
WDP: All agencies should now be able to view other agency contacts.	The Agency Contacts screen was not populating contacts for some agencies, but now it is corrected and shows all agency contacts.
ARM: Bug Fix-- Users can save a FAPE district without entering FAPE Responsible school.	ARM users couldn't save a FAPE Responsible school district without entering a FAPE Responsible school, but this is fixed now.
ARM: Bug Fix-- ARM now works for all CESAs.	CESA 5 was getting an error when trying to change agencies in the ARM, but this bug is resolved.
WDP: Bug Fix-- Error 6469: Overlap of Enrollments throws appropriately now.	Error 6469 wasn't throwing when it should have been because it wasn't looking at null exit dates, but now it will display as expected.
WDP: Bug Fix-- Error 6499: Credential Type not Expected throws appropriately now.	Error 6499 was throwing errors incorrectly about student academic records, but this has been fixed. The long error message text has been modified to better explain how to fix this error.
API: When WISEids have been merged, the system will check for the correct WISEid.	For WISEids that were merged, you will now see the correct WISEid and know if you enter the incorrect one of the merged IDs.
EdCred: API clients under a DPI application were moved to the correct vendor/application.	Certain API clients had the incorrect vendor or applications attached, so this has been resolved to move the clients to the correct vendor/app.
WDP: Data Statistics modifications were made in WDP to account for additional scenarios.	Data Statistics modifications were made in WDP to account for additional scenarios.

<p>* Note: Good progress was made on manual validation functionality and API Roster development</p>
