

WISEdata Release Notes: 10/23/18

Title	Description/Comments
EdCred: Bug Fix--Exit to Secure Home option works properly.	In the last 10/9 release, we added an Exit option to the Ed-Fi Credential application to navigate back to Secure Home rather than logging out entirely. This wasn't working well, but the issue was resolved.
WDP: Bug Fix--Staff records now linking in WISEdata	We had a bug where the staff records weren't making it into WISEdata to link to Roster data, but this is working now.
WDP: New rule 6628	We implemented new L2 error 6628 : District of Residence is invalid for public schools.
WDP: Logic change for rule 6631	We updated the logic for L2 rule 6631: District of Residence if invalid for independent charter schools.
WDP: New rule 6802	We implemented new L2 validation rule 6802 : Race is a required property in WISEdata.
WDP: Updated and implemented new WISEdata/WISEid mismatch logic	Due to user requests that WISEdata/WISEid mismatch rules cease throwing to districts that no longer serve the student, we modified logic regarding WISEdata/WISEid mismatches. Now we implemented rule logic so we will throw validations only for the current enrollment-holding district for a length of 18 months.
New and/or Updated Documentation	<ul style="list-style-type: none"> ● Updated text for KBA 6631 ● New WISE Classroom page with 3 e-learning courses available ● Added Choice K4 enrollment info to Early Childhood page
