WISEdata Release Notes: 10/5/21

Title	Description/Comments
WDP: Update to Agency Contacts page	The Agency Contacts page now displays all active WISEdata contacts for all active WISEdata Portal school years. Contacts' areas of interest and snapshot acknowledgement responses also appear.
WDP: New validation error for certificated program status type	Validation error 7164 has been added to help verify that a certified program submitted for a student is submitted with its certificated program status type.
WDP: Bug Fix - Validation queue stops running	Previously, an issue caused the validation queue to stop and fail to complete a validation run. This issue is now fixed.
WDP: Bug Fix - Course Offering export shows zero staff	Previously, an issue caused the Course Offering export to show 0 in the Staff Count column when it should not. This issue is now fixed.
WDP: Bug Fix - Student Section Association export times out	Previously, the Student Section Association WISEdata export could time out before it completed generating an export file. This issue is now fixed.
WDP: Bug Fix - Error 7139 throws for incorrect students	Previously, an issue caused validation error 7139 to appear for students it is not supposed to apply to. This issue is now fixed.
WDP: Bug Fix - Warning 7149 throws for non-K4 students	Previously, an issue caused validation warning 7149 to appear for students who are not in K4. This issue is now fixed.
