WISEdata Release Notes: 11/17/20

Title	Description/Comments
WDP: Detailed column definitions available for more WISEdata Portal exports	We've added more detailed column definitions in WISEdata Portal for several WISEdata Portal exports. You can access this information on the Exports page in WISEdata Portal by clicking the Definitions link next to the export you want information about. The Definitions link is now available for the following exports: ● Attendance - YE ● Enrollment - 3rd Friday September ● Mass Enrollment Export
WDP: Student email now visible only to the agency that submitted the email address	A student's email address in WISEdata Portal now appears only to users at the agency that submitted that email address to WISEdata. This behavior is now consistent with how a student's mailing address appears.
WDP: Apostrophes now accepted in student search	Student names that include apostrophes can now be searched for in WISEdata Portal.
WDP: Bug Fix - Validation rule 6719 no longer throws errors incorrectly	Previously, validation rule 6719 could throw an error based on enrollments for the next school year or PPP enrollments. This issue is now fixed.
WDP: Bug Fix - Validation rule 7118 now clears appropriately when a subsequent enrollment exists	Previously, validation rule 7118 might still throw an error when a student has a subsequent enrollment. This issue is now fixed.
WDP: Performance Improvement - Student API View	Previously, the API view on the Student Details page could time out. This issue is now fixed.
