

WISEdata Release Notes: 11/5/20

Title	Description/Comments
WDP: Data quality alerts in WISEdata Portal	<p>To help you ensure data quality as you prepare for the WISEdata annual snapshot, data quality alerts now appear in WISEdata Portal to let you know about potential corrections that might be necessary. Data quality alerts appear on the Alerts page in WISEdata Portal alongside system alerts.</p> <p>For more information about these new data quality alerts, refer to the WISEdata Portal Alerts Mini Tutorial.</p>
WDP: Filter validation messages using validation message tags	<p>To help you identify validation messages that need your attention and better sort messages, you can now filter validation messages on the Validation Messages screen by tags that you've applied. You can select multiple tags to show messages with any of those tags applied.</p>
WDP: T-Mobile Project 10Million submission page in WISEdata Portal	<p>We've added a new page in WISEdata Portal that eligible districts can use to submit students who receive a mobile hotspot through the T-Mobile Project 10Million program. For more information, refer to the Project 10Million page.</p>
WDP: New validation rule to check for continuing student enrollment for a student with a new WISEid transferring between districts	<p>We've added new validation rule 7118 to check for a continuing enrollment for a student with an inactive WISEid and an exit type that indicates a transfer between districts.</p>
WDP: Update to validation rule 6474	<p>Validation rule 6474 has been updated to throw an error for schools that submit zero</p>

	attendance but are not flagged as having no enrollment for the school year.
Ed-Fi Credential: Bug Fix - Fixed a potential server error	Previously, a user could encounter a server error on logging into Ed-Fi Credential. This issue is now fixed.
Ed-Fi Credential: Bug Fix - Agency name now appears in the unsubscribe confirmation window	Previously, the confirmation window that appears when removing a vendor subscription for an agency did not show the name of the agency. This issue is now fixed.
WISEadmin Portal: Agency Contacts acknowledgment data now appears correctly	Previously, snapshot acknowledgments might appear incorrectly on the Agency Contacts page for WISEdata primary contacts. This issue is now fixed.
WDP: Bug Fix - School Year filter on Student Details page now works correctly	Previously, the School Year filter could appear blank on the Student Details page. This issue is now fixed.
