WISEdata Release Notes: 11/7/19

Title	Description/Comments
WDP: WISEdash extracts for Choice schools	We've added new data extracts to help Choice schools calculate graduation rates, dropout rates, and high school completion rates using data normally available only in WISEdash for Districts. For more information, refer to the help page on the DPI website.
WDP: New L2 validation rules	We added the following new L2 validation rules to help ensure your data is valid: ● 7095 - Student's WISEid is no longer active and student may count as a mid-term dropout. This rule applies for situations where WISEids have merged. ● 7096 - One or more students in the prior school year may become a full-term dropout. This rule applies for situations where WISEids have merged. ● 7108 - No ELP code has been provided for the student. ● 7109 - Homeless program association's begin or end date falls outside the DPI school year. ● 7110 - Food service program association's begin or end date falls outside the DPI school year. ● 7111 - Language instruction program association's begin or end date falls outside the DPI school year.
WDP: Student Detail Demographics panel no longer times out	We fixed an issue causing the Demographics panel on the Student Detail screen to time out instead of loading correctly.

WDP: Roster panel no longer shows duplicate information	We fixed an issue that caused the Roster panel on the Student Detail screen to incorrectly show duplicate information.
