

WISEdata Release Notes: 12/1/20

Title	Description/Comments
WDP: Most recent validation run now shows the school year on the WISEdata Portal home page	The most recent validation date that appears on the WISEdata Portal home page now includes the school year that data was validated for to prevent confusion when comparing this date with the Validation page.
WDP: IAC codes and career pathways now loaded for 2020-21 school year	WISEdata Portal now includes IAC codes and career pathways for the 2020-21 school year.
WDP: Bug Fix - Exporting data no longer fails if some data has been deleted	Previously, exporting validation messages could fail if some data had been recently deleted. This issue is now fixed.
WDP: Bug Fix - Fixed validation errors firing incorrectly	Previously, validation rules 7127 and 7141 could throw errors when they shouldn't. This issue is now fixed.
WISEadmin Portal: Bug Fix - Error no longer occurs when submitting data errata	Previously, a server error could occur when a user submitted data errata. This issue is now fixed.
