WISEdata Release Notes: 1/29/19

Title	Description/Comments
API: 2016-17 API turned off	We turned off the 2016-17 school year API, meaning you will no longer be able to submit 2016-17 data to WISEdata or view it in the WISEdata Portal. All validation checks of 2016-17 data were disabled.
Roster: Turned on Roster L2 validations	Roster L2 validations were turned ON. Depending on the status of your submitted Roster data, you may see new validations in the WISEdata Portal. ● New Roster L2s include (6787, 6788 are already on): 　○ 6769 　○ 6798 　○ 6797 　○ 6774 　○ 6773 　○ 6772 　○ 6771 　○ 6770 　○ 6768 　○ 6767 　○ 6766
Roster: Added ID to exports	We added an 'ID' column to the Roster exports for both staff and student section associations, so users can more easily spot and/or remove incorrect data. This should save districts approximately 10 minutes of data cleanup time.
WDP: Added Safe at Home Banner	We created a Safe at Home Banner that will display in red across the top of student pages for any student who is identified as being part of the Safe at Home program.

WDP: Bug Fix--Validations Run Status is accurate.	We had an issue when Validations Run Status was not showing the right times, but this has been fixed.
WDP: Bug Fix--Resolved timeout issue causing Access Forbidden errors	We had a bug that due to application timeout settings, users were receiving Access Forbidden errors when trying to log in. The issue was resolved.
