WISEdata Release Notes: 1/3/19

Title	Description/Comments
WDP: Bug Fix--Count Inclusion logic works correctly.	We had a bug where if a student school association, SSA, had an Entry Date and Exit Withdraw date that did not cover the Count Date, then the Count Inclusion should have been NULL for that SSA, but it was looking at 6/30 of the school year enrollment. This has been resolved.
WDP: Bug Fix--Rule 6582 works properly.	We fixed a bug for L2 - 6582 because the logic wasn't running properly for students in grade level 12.
WDP: Bug Fix--Rules 6751 and 6377 run only for active, open schools.	We had a bug where L2 validations 6751 and 6377 were running for closed schools, but this was resolved.
WDP: Bug Fix--School Filter type-ahead prompt feature works now.	We resolved a bug for when the type-ahead feature on the School filter was not working.
WDP: Enhancement to Work in Process bookmark	We modified the new Work in Process (WIP) Bookmark filter checkbox so that is it not enabled until users pick at least one message type filter. See an info icon: 'When checked, validation messages with a work in process (WIP) bookmark will return. A message type (e.g. Error, Unacknowledged Warning, etc.) MUST BE SELECTED to enable the WIP checkbox.'
WDP: Bug Fix--Enrollment panel displays data.	Previously, we had a bug when the WDP -Enrollment panel showed as empty in the detail screen, but this has been fixed.
WDP: Bug Fix--Rule 6581 throws properly.	We resolved a bug with L2 validation 6581 because it was throwing when it shouldn't because the Expected Transfer School was

	NULL. We changed the logic to ensure the rule throws correctly now.
	*The bulk of work consisted of 2019-20 work on the new Finance application and API v. 3.0.
