

## WISEdata Release Notes: 3/26/19

Title	Description/Comments
<b>WDP:</b> Bug Fix--Rule 6768 works correctly.	We had a bug with validation rule 6768 because this rule would show on only one section when it was tied to multiple and should have been visible on all the linked sections. This issue was resolved.
<b>Roster:</b> Bug Fix--Student section association export displays correctly.	We had an issue with the Roster student section association export in that Dual enrollment programs should show separately if there are multiples, but the export was displaying repeated values. We fixed the bug, so exports display appropriately.
<b>WDP:</b> New Choice Opt-in/Opt-out label	For Choice school users, we have a new blue header at the top of WISEdata Portal screens to alert as to whether your school has opted in or out of the All Students Report Card. The label will display as 'Private School - All Students Report Card:' with the value being 'Opt In', 'Opt Out', or 'Unknown'. This will help Choice school users more quickly identify which students and coordinating data elements to submit to DPI.
