

WISEdata Release Notes: 4/23/19

Title	Description/Comments
WDP: Bug Fix--Rule 6396 throws properly.	We had an issue with validation rule 6396, but we resolved it by modifying the logic to allow special characters.
WDP: Bug Fix--Rule 6779 works properly.	We fixed the bug with rule 6769 to throw appropriately based on the ELP codes checked.
WDP: Bug Fix-- WISEdata Portal charts display appropriately.	We had a bug with the charts in the WISEdata Portal timing out, but we corrected the issue so that they will display appropriately.
WDP: Added 'Grade Level' column to Special Ed Export	Based on user requests, we added a column for the Grade Level to the Special Education Data Export. This helps District Assessment Coordinators to ensure accommodation for state testing, which is based on grade level.
WDP: User-friendly improvements to LEA Homepage	We made some modifications to the WISEdata Portal LEA Homepage to make it easier to understand for what each section is used and what to notice. There is more visible on-screen help text and less white space to help users focus on exactly what they need to know.
