WISEdata Release Notes: 5/28/19

Title	Description/Comments
WDP: New Aging column in Validation Messages	We added a new column to the Validation Messages screen in the WISEdata Portal to call out how many days have elapsed since the validation message first displayed in the portal. This was a user-requested feature that will save a few minutes of time when divvying validation resolution workload and tracking which validations are taking longest to resolve.
WDP: Home Page modified to account for Identity API vendor use	We made some updates to the WISEdata Home Page functions to allow Identity API vendors to display consistently and with similar features to other SIS vendor tracking.
API: Updates to Rules API for v.3	We made some updates to the API for v.3 rules to account for new fields and setup.
WDP: New Career Education rules	Several L2 validation rules for CTE were implemented and turned on. They include: ● 6783 ● 6784 ● 6786 ● 6789 ● 6790 ● 6791 ● 6794 ● 6795 ● 6796 ● 6800 ● 6915
