

WISEdata Release Notes: 6/5/18

Title	Description/Comments
WDP: Bug Fix--Rule 6679 now throws correctly.	We had an issue with validation rule 6679 that says 'Serious Bodily Injury' is required for IDEA eligible students where discipline is 'Placement in IAES by School Personnel'. The error was throwing even when the discipline action wasn't placement in IAES. This bug has been resolved.
WDP: New Validation Category filter for validation messages	On the Validation Messages page in the WISEdata Portal, we added a filter for Validation Category. Now you may choose to view validation messages that fall under a particular data area, such as attendance, enrollments, special education, etc. The results will default to All Validations, though.
	*The majority of development work is continued efforts on 2018-19 changes for Roster, Career Education, and the new Home page in the WISEdata Portal.
