

WISEdata Release Notes: 6/2/20

Title	Description/Comments
WDP: Secure Home link in WISE applications now points to WISEhome	We've updated the Secure Home link across WISE applications to link directly to WISEhome so that you no longer need to be redirected from Secure Home.
WDP: New validation warnings for reviewing and acknowledging dropout rate and status prior to snapshot	We've released two new validation warnings that prompt you to review and acknowledge your dropout rate and student dropout status before a WISEdata snapshot occurs. These rules are now released and will be enabled for the next WISEdata snapshot. The new validation rules include: <ul style="list-style-type: none">• 7143 (for public schools)• 7144 (for Choice schools)
WDP: Bug Fix - Warning 7107 no longer appears when it shouldn't	Previously, validation warning 7107 could show a warning message when its criteria weren't actually met. This issue is now fixed.
WDP: Bug Fix - Warning 6712 no longer appears when it shouldn't	Previously, an issue caused validation warning 6712 to show a warning message for a student whose reported age is not outside of the expected range for their grade. This issue is now fixed.
