

WISEdata Release Notes: 7/31/18

Title	Description/Comments
API/WDP: Disabled 2015-16 SY	Now that we've opened up the WISEdata Portal to accept 2018-19 school year data, we opted to have just three years open at a time. Consequently, we disabled the 2015-16 school year.
EdCred: Bug Fix--Unsubscribe button works properly now.	We had a bug in the Ed-Fi Credentialing tool that caused the Unsubscribe button to break. We resolved the issue, and now users can unsubscribe from a vendor.
WDP: New rule 6751	We implemented a new L2 validation rule 6751: No Discipline records for this school in the previous school year.
WDP: Modified logic for rules 6381 and 6601	<p>Previously, rules 6381 and 6601 would throw in advance of applying to the student, which inflated the error counts for schools. We modified the logic to throw only after crossing the count dates to which they apply, so users get error counts that matter.</p> <ul style="list-style-type: none"> ● 6381 shouldn't throw until after 3rd Fri. of Sept. for the year in context ● 6601 shouldn't throw until after Oct. 1 for the year in context
WDP: Bug Fix--Rule 6761 throws properly now.	We had an issue where L2 rule 6761 for checking homeless record overlap where the error was not showing for the last overlap record, but this has been fixed.
WDP: New Career Education area of interest in Acknowledgments	'Career Education' has been added as an area of interest in the Acknowledgments for the WISEdata Portal. Now the user can select

	Career Ed, so DPI can tie LEA data contacts for Career Ed to WISEdata for a contact list.
WDP: New Status column in Change Agency	We added a Status column on the WISEdata Portal Change Agency screen similar to the one in WISEid so that users can see the status of an LEA to handle scenarios where LEAs have closed or merged.
WDP: Added L1 rule KBA links	We implemented direct links to L1 error KBAs within the WISEdata Portal. Note, not all L1 errors have associated KBAs yet, but more will come out in the near future.
Roster: New error icon for Roster school-level sections	We added an error icon on the Roster school-level sections for L2 rules related to a section.
Roster: New Logical Class Section export	In the WISEdata Portal export options, there's a new Roster export for Logical Class Section. User can download a .csv file of all their school's logical classes.
WDP: Modified School Year Filter options	We updated all the WISEdata Portal pages that had a filter for School Year, so 'School Year' filters align first with the current, active year and then by the years the school was active. For example, if a new school checked the drop-down options, they wouldn't see a prior year when they weren't open yet.
New and/or Updated Documentation	<ul style="list-style-type: none"> ● Special Education FAQs updated #17 ● Count Date data element page: Added guidance on if non-attendance day scheduled for count date ● Changes to ELL KBAs ● 6597 KBA added Leap Year birth date guidance
