WISEdata Release Notes: 7/15/21

Title	Description/Comments
WDP: 2021-22 school year now available in WISEdata Portal	Starting with today's release, data for the 2021-22 school year can now be submitted to and reviewed in WISEdata Portal.
WDP: New validation tag for EL Team	You can now tag validations with the new EL Team tag, helping users who work with EL validations find errors and warnings that need their attention.
WDP: New columns available in Course Offerings export	The WISEdata Portal Course Offerings export now includes the following new columns: ● Dual Enrollment ● World Language ● Medium of Instruction
WDP: New validation rule checks for students whose sSEPA record ends before enrollment	The new validation rule 7161 throws an error if a student's sSEPA end date is before the student's enrollment end date. For more information, refer to the linked knowledge base article.
WDP: Graduation Plan collection now available to DOC schools	DOC schools can now submit Graduation Plan data to DPI through WISEdata. For more information on submitting graduation plans, refer to the list of Graduation Plan data elements.
WDP: Bug Fix - "Editable By" field on Student Details screen now shows correct information	Previously, the "Editable By" field under Demographics on the Student Detail screen could show the incorrect school. This issue is now fixed.
WDP: Bug Fix - API view for sLIPA data no longer times out	Previously, users could experience a timeout while using the API view to review sLIPA data. This issue is now fixed.
