

## WISEdata Release Notes: 8/28/18

Title	Description/Comments
<p><b>Career Education:</b> CTE Participation flag</p>	<p>We created a CTE Participation flag on the student's enrollment (sSA) record from 2018-19 moving forward.</p> <p>CTE Participation logic calculates for the flag to display if a student has a Section Association (enrollment) record for a course that has a 'CTE flag', at which point the student is considered a participant.</p>
<p><b>DB/Calculation:</b> Simplified calculation of Composite Proficiency Level</p>	<p>We created a new, simplified calculation for DPI Composite Proficiency Level:</p> <ul style="list-style-type: none"> <li>● If previous ELL had a value, then DPI Composite Proficiency Level = Composite ELP Level</li> <li>● If previous ELL value = NULL, then DPI Composite Proficiency Level = NULL.</li> </ul>
<p><b>EdCred:</b> Added specific error message</p>	<p>We added a more specific and detailed error message if you encounter an error in the Ed-Fi Credential application.</p>
<p><b>API:</b> Roster staff data part of manual and daily Import Job</p>	<p>We included Roster staff data updates and additions in both the manual triggering of import and validation as well as the daily import job at 5 p.m.</p>
<p><b>WDP:</b> Rule 6395 logic change</p>	<p>We changed the L2 validation rule 6395 about race/ethnicity to only display the error to the current enrollment-holding school (sSA).</p>
<p><b>WDP:</b> Bug Fix--Rule 6617 works properly now.</p>	<p>We had issues with L2 validation <u>6617</u> not throwing when it should have, but this bug was resolved.</p>

<b>WDP:</b> Bug Fix--Rule 6626 text updated	Previously we had a mismatch in text and logic for the L2 validation <a href="#">6626</a> , but this has been fixed and is consistent now.
<b>WDP:</b> New rule 6655	We implemented new L2 validation warning <a href="#">6655</a> : Student was previously submitted with an exit type of 'Death.'
<b>WDP:</b> Bug Fix--Rule 6679 throws properly.	Rule <a href="#">6679</a> was not throwing when it should have been, but this was resolved.
<b>WDP:</b> Bug Fix--Rule 6694 throws properly.	We fixed warning <a href="#">6694</a> to throw properly.
<b>WDP:</b> New rule 6711	We implemented L2 validation warning <a href="#">6711</a> : Grade level of current enrollment record is lower than previous enrollment record in the same school year.
<b>WDP:</b> Updated logic and text for rule 6751	We updated the logic for validation rule <a href="#">6751</a> for when to throw the warning as well as the rule text. Note, this new Discipline-related warning alerts schools that didn't report any Discipline data. Schools MUST acknowledge this warning only when they have verified there are no suspensions or expulsions to report. Acknowledging this message satisfies the requirement to submit the Gun Free School Act (GFSA) report to DPI each year.
<b>WDP:</b> New rule 6792	We implemented new L2 validation warning <a href="#">6792</a> : Grade level of current enrollment record is lower than enrollment record of the immediately previous school year.
<b>WDP:</b> Replacing rules 6514 and 6515 with 6793	We have deactivated validation rules 6514 and 6515. They will be replaced by L2 rule <a href="#">6793</a> .
<b>WDP:</b> Bug Fix--Rule 6631 throws properly.	We had a bug where rule <a href="#">6631</a> should not have thrown for the 2017-18 school year, but it did. We have fixed this issue.

<p><b>WDP:</b> Validation Category added to Validations Export</p>	<p>We added a column for Validation Category to the Validation Messages Export so that users can filter and sort by this.</p>
<p><b>Career Education:</b> CTE Concentration flag in Student Details</p>	<p>We implemented a new 'CTE Concentration' flag that shows up in the Student Details screen and on the CTE export. The flag will display as 'True' if it satisfies the following conditions:</p> <ul style="list-style-type: none"> <li>● Student CTE Program Association is submitted with Program Type and Program Name 'Career and Technical Education'</li> <li>● CTE programs piece exists with the Career Pathway Type and the IAC Code Type (Program area could be blank)</li> </ul>
<p><b>Career Education:</b> New CTE Participants/Concentrators Export</p>	<p>In the WISEdata Portal, we implemented a new export file to populate 'CTE Participants/Concentrator details', so LEAs can validate all the data they sent was received and then leverage this file for additional analysis.</p>
<p><b>Roster/CTE:</b> CTE Participant flag in Roster enrollment row</p>	<p>We added a 'CTE Participant' flag in the Roster Enrollment row of the WISEdata Portal's Student Details screen. The flag will display if a student has a student Section Association (enrollment) for a course that has a 'CTE flag' to mark the student as a participant.</p>
<p><b>WDP:</b> Sorted Home Page metrics</p>	<p>By UserVoice request, we updated the summary metrics on the new Home Page to make sure metric rows sort in order by descending school year and display school year range, i.e., 2017-2018 versus 2018.</p>

<p><b>WDP:</b> Delete errors display on Home Page Vendor drill-down.</p>	<p>In the WISEdata Portal’s Home Page Vendor section drill-down, we now display any DELETE error rows. Seeing failed Delete attempts can be helpful, so an LEA can provide info to the vendor that DELETE calls were attempted when the records weren’t present.</p>
<p><b>WDP:</b> Removed WISEdata Portal Data Statistics panel</p>	<p>We removed the 'WISEdata Portal Data Statistics' panel on the Data Quality page because now the LEA Home Page houses this information and other stats.</p>
<p><b>WDP:</b> Added course data elements to the Validation Messages page</p>	<p>We added additional data elements for each entity on the WISEdata Portal Validation Message screen to save time for users.</p> <ul style="list-style-type: none"> <li>● Added: Last Name, First Name, School, Enroll Date, Term, Local Course Code, Class Periods Location, Grading Period Descriptor</li> </ul>
<p><b>WDP:</b> Added Grade Level to Roster and Enrollment panels in Student Details</p>	<p>We added Grade Level on the Roster enrollment row and Enrollment panel row of the WISEdata Portal Student Details screen. Users can leverage Grade Level values when fixing errors related to incorrect grade levels associated to the FLEX or FLES (World Language) programs.</p>
<p><b>WDP:</b> Bug Fix--Career Education Ed-Fi API view works.</p>	<p>We had a bug that when you clicked CTE Ed-Fi API View, you’d receive an error while processing the request. We’ve resolved this issue.</p>
<p><b>WDP:</b> Bug Fix--Contact Acknowledgment works properly.</p>	<p>We resolved a bug where when users logged into the WISEdata Portal they were receiving Contact Acknowledgment errors.</p>
<p><b>New and/or Updated Documentation</b></p>	<ul style="list-style-type: none"> <li>● KBA 6631 new text and logic</li> </ul>
