WISEdata Release Notes: 9/8/21

Title	Description/Comments
WDP: Update to CTE Participant inclusion calculation	We've updated how WISEdata Portal marks students as CTE participants. Previously, WISEdata included students as CTE participants whose attempt status was submitted as "sufficient." After the update, WISEdata now only excludes students whose attempt status is submitted as "insufficient," to prevent students falling through the cracks.
WDP: Added Details link to more WISEdata Portal exports	We've added the Details link to the following WISEdata Portal exports so you can view column definitions: ● Mass Validation Message ● School Roster ● Student Roster ● Other Programs
WDP: Validation complete emails now include school year	Emails generated when a validation job is complete now include the school year(s) that the validation was run for, helping clarify
WDP: Validation rule 7161 now runs for non-primary parentally placed private enrollments	Previously, validation rule 7161 could miss throwing an error for sSEPA records for a student with a non-primary parentally placed private (PPP) enrollment. The rule now includes enrollments with the PPP enrollment type.
WDP: Bug Fix - Validation banner doesn't appear in certain scenarios	Previously, the "data isn't current" validation manner didn't appear when it should. This issue is now fixed.

WDP: Performance improvement for WISEdata Portal CTE Participant export	We've improved the performance for the CTE Participant WISEdata Portal export to help prevent timeouts.
WDP: Performance improvement for WISEdata Portal pages	We've improved the loading times and general performance for the following WISEdata Portal pages: ● Student Search ● Student Details page > Roster section
