

Release Notes for 3/1/2016 WISEid/WISEstaff Production Release (WISEid Core Apps Sprint 103+ hotfixes)

Feature Title	Notes
WISEid: UI add birth location data fields for 2016 public release	For summer release new person birth location fields. Hidden for now.
STAFF: ValidateAssignmentQuestionAnswers Secondary Validation performance	Improved performance for assignment question validation. Improves assignment upload performance and Validation Staff Data.
STAFF: ValidateAssignmentDynamicQuestionAnswers Secondary Validation performance	Improved performance for assignment dynamic question validation. Improves assignment upload performance and Validation Staff Data.
WISEid: Add 2016 Public Release new data elements to Downloads	For summer release new person upload birth location fields. Hidden for now.
STAFF: Delete any unnecessary messages to improve performance and DB size	Remove deactivated validation messages to improve validation message performance for staff validation.
STAFF: Performance Convert Assignment uploads to merge statement	More performance improvements on Assignment uploads.
WISEid: Update for latest format Person Upload Download file	Download file for Person Uploads was not matching current Person Upload format for required columns. Fixed so user can upload Results Person Download after corrections if they would like to..
WISEid: Add link to download errors when Person Upload results in Errors	In Results when the user clicked on Person Upload Errors there was no Download link to download the errors. This is now in place and similar to Staff Contract and Assignment Error Downloads.

<p>STAFF: Move message 4051 and 6327 to Contract Download File</p>	<p>Message that were specific to Contract uploads at time of upload are now moved from Validation Staff Data to Results Contract upload Download file.</p>
<p>STAFF: Final Certification above Initial</p>	<p>On Sign off or Certification page when Final Certification is enabled it will be on top of page. Initial Certification will below Final Certification when enabled.</p>
<p>Staff: modify Sign Off or certification so message displays when both initial and final cert active</p>	<p>When both final and initial certification of staff data is disabled for non-DPI users the message "DPI has disabled District Certification and Agency Ready for Audit Review at this time."</p>
<p>WISEid: Hotfix EF Performance Toggle causes Person upload errors</p>	<p>A performance boost for person uploads had faults with large files so we had to turn off until we had a fix. We fixed so large files will process without faults and performance boost was turned back on.</p>
<p>STAFF: Results queue showing older uploads in both queues</p>	<p>All Contract and Assignment uploads before 7/1/15 are now only shown in the 14-15 instance for recollection.</p>
<p>STAFF: edit existing assignment in UI overwrite with new values and removes non asked questions</p>	<p>Assignment UI edits when a user changed and Assignment for one assignment code to another had problems and non-required assignment question data was not removed. Fixed so users can change assignment codes and have all questions work as they should and non-required assignment questions get removed.</p>
<p>WISEid: Bug Person Search local person ID search broken</p>	<p>In Person Searches user could not search their agency by Local Person ID. This has been fixed.</p>
<p>WISEid: 6304 error is missing in action</p>	<p>Message 6304 "Entity ID in upload doesn't match the WISEid person Entity ID" was broken. Now goes in Results Person</p>

	Upload Download file.”
WISEStaff Caution banner in 14-15 app	Revised caution banner for the 14-15 recollection instance to be very clear which year users are in and made it black and white to make sure color blind users can see.
WISEid: Add to suffix options	Added new suffix option of “V” for person names.
STAFF: hotfix Bug Salary Report contract issues	Salary Report is displaying incorrect Highest Degree and other info from wrong years. We fixed this issue.
STAFF: hotfix Bug Salary Report 14-15 filter broken	Ability to see 14-15 data in the Salary Report by filter was broken. We fixed this issue.
