

Release Notes for 4/4/2016 WISEid/WISEstaff Production Release (WISEid Core Apps Sprint 105)

Feature Title	Notes
WISEid: Create Person UI Race/Ethnicity L1 validation should occur at the same time as first & last name L1 validation	When doing a Person upload if a row had errors some errors showed up only after other errors in that same row were resolved. Now all errors appear.
WISEid: Add Birth Location and Parent/Guardian information to Merge Screen	Added birth location and parent/guardian information to the merge resolution screen. Helps with DPI CST making better merge decisions.
WISEid: Download by Local Person ID Add Local Person ID Key Type	Added Local Person ID Key Type to both Staff Download by Local Person ID AND Student Download by Local Person ID
WISEstaff: Salary Report Sort by Position, By Last Name	Salary Report is sorted alphabetically by Assignment Position and then by last name, first name.
WISEid: Review Matches Add Remove All Button	In the WISEid tab Review Matches screen we now have the Remove All button. Previously this could only be done with individual upload Potential Matches.
WISEid: Local Person ID student add in edit catch for missing Parent guardian	When editing a Local Person ID type to student we first require 1 Parent/Guardian before the Local Person ID can be changed from staff to student.
WISEid: 2016 Public Release - UI birth location character set	For July 11th release enforce birth county, birth county, and state fields to same character set as we use already use for names.
WISEid: Birth Location Fields UI Type Ahead/Auto Complete Using CEDs List	For July 11th release we provide auto text suggestions while type for users to input Birth County and Birth Country. The suggestions come from lists used by CEDS, but we don't enforce just

	suggest. User can override if necessary.
WISEid: Update app to allow null race keys and fix any UI breakages	Changing WISEid so that legacy records where there we only have legacy race/ethnicity codes can be imported into the system. In such cases if you edits such a person or make them a Local Person Key Type of Staff you must add the regular race/ethnicity code.
STAFF: Change Search Edit description (race ethnic MUST be race/ethnicity)	Changed Person Search Edit description for race ethnic to race/ethnicity.
WISEid: Hotfix Entity ID job fails when same WISEid has multiple Entity IDs	Fixed issue when some Entity IDs not getting populated when they should because they have multiples of the same names in WISEid.
