

**Release Notes for 10/4/2016 WISEid/WISEstaff Production Release (WISEid Core Apps Sprint 119)**

Feature Title	Notes
WISEid: Change Request Orange Alert Notification on WISEid Home UI	Orange notification on the WISEid home page about Change Requests that should be reviewed will only be activated if there are Change Request the selected agency has a pending change request. Pending change request can either be originating in selected agency or requires a vote by selected agency.
WISEid: Speed up the upload queue by allowing files to process independently of other upload jobs	Changed queue so that validation of WISEid Person Upload files occurs as soon as possible before file even gets processed. This gives users ability to cancel uploads before they get processed if they see a lot of validation errors. Also, speeds up the queue in cases where multiple files are uploaded statewide.
WISEid: remove staff persons from DWDS person search views	Only effects our data warehouse teams matching of test results to persons. Removing staff and persons over school age from matching possibilities to make sure only students get matched.
WISEid: Hotfix Potential Matches blocked when Local person ID same but of another type	Fixed issue when doing a potential match and choosing a new WISEid record. If person you uploaded had Local Person ID of someone of opposite type it would block the creation of the new person. We have fixed so we only look for Local Person IDs of the same type (staff or student).
STAFF: Fix manage dynamic questions page	Assignment dynamic questions page for DPI Admin had a bug where new assignment codes could not be added. We fixed issue so DPI could configure dynamic questions correctly for new assignments for 16-17.

<p>STAFF: Run 4034 validation at the end of the CopyElo job</p>	<p>Every night we have a job that attempts to populate Entity IDs if there are matches in the ELO system. At the end of the job we were running a full statewide validation. This caused numerous problems as sometime it would run in the daytime causing severe system performance. Now we have created a mini validation job to run instead that only updates the 4034 missing Entity IDs errors statewide. This means DPI will not be running statewide validations other than shortly before initial and final audits. Districts can run on the Validate Staff Data page.</p>
<p>STAFF: Analysis - EdStix data migration</p>	<p>Looking into options for replacing Oracle state and federal reporting tables with MS SQL versions.</p>
<p>STAFF: Change to validation message 5800</p>	<p>Revised validation message 5800 to "The Grade levels are not required for this assignment. During the report check off process the value will be deleted."</p>
<p>STAFF: Modify Job Scheduler</p>	<p>Added more functionality to the DPI only area to manage automated jobs in WISEid and WISEstaff. Will result in less problems of jobs running when they should not and causing performance problems for the system.</p>
<p>STAFF: Add New Assignment code 96-0891 Instructional/Special Ed Early Childhood</p>	<p>Configuring the system for 16-17 WISEstaff opening.</p>
<p>STAFF: Add assignment 53-0778 - Teacher/Montessori</p>	<p>Configuring the system for 16-17 WISEstaff opening.</p>
