

**Release Notes for 10/18/2016 WISEid/WISEstaff Production Release (WISEid Core Apps Sprint 120)**

Feature Title	Notes
WISEid: Change Request Comments Field Available for All Statuses	Users couldn't add comments to Change Requests because we forgot to deploy new security permissions to the production site. Now users can add comments to Change Requests.
WISEid: Create Person Search Service for Collections Team Use	Created a search service for more current WISEid person information that will be used in WISEdata.
WISEid: Create Special Ed Search Service part 1	Delivered service of WISEid info to Special Eds applications
WISEid: Hotfix Potential Matches blocked when Local person ID same but of another type	During match review is a person has a Local Person ID that was the same as a different type (Staff or Student) it was blocking the match review from completing. We resolved so this block only happens when the Local Person ID is of the same type.
WISEid: Improve WISEid home page performance	WISEid home page was taking awhile to load. We improved the performance by changing some of the conditional message logic.
WISEid: Messages and Change Requests - add filter by Local Person ID type	Added a filter on the Message and Change Request so user can filter by the agencies Staff or Student Local Person ID type.
WISEid: Modify Search Service for names with spaces	Search Service was not finding non-spaced versions of names when spaces were included. We have adjusted so space or no space will find same results. For example last name "Mc Donald" and "McDonald" will be found for same search. Will improve auto matches as well.
WISEid: Remove Born Outside US Indicator - file upload	Born Outside US column is not required in Person Upload. Will be ignored if provided.

<p>WISEid: Remove Born Outside US Indicator - UI changes</p>	<p>Born Outside of US field removed in product. Column still in downloads, but no data in it so that existing downloads will not be broken.</p>
<p>WISEid: Results Person Upload Add ability to click errors when invalidated state</p>	<p>When Person uploads are uploaded the validation phase now runs ahead of other steps. Once validation errors are found you will now be able click on them and see them. If file hasn't started processing you can cancel file upload and fix validation errors with a new upload.</p>
<p>WISEid: Results Person Upload keep number in queue when in validated state</p>	<p>When Person uploads are uploaded the validation phase now runs ahead of other steps. The number in the queue was going away even though the file only had validation step complete and didn't start to processed the file. We have restored the number in the queue which was broken last sprint.</p>
<p>WISEid: Review Matches add Local Person ID Type filter</p>	<p>On the Review Matches screen you can now filter by Local Person ID type of Staff or Student to limit the group the end user is working with.</p>
<p>STAFF: Create Validation Error when only legacy race/ethnicity exists</p>	<p>When Staff Validation is run if the WISEid person being updated in the staff upload has a Legacy Race Key only an error message # 6527 will require you to update the Race Ethnicity to the regular two part question type.</p>
<p>STAFF: Hotfix Copy Forward broken because of assignment active field removal</p>	<p>Copy Forward files were broken because of a removal of a database field. We fixed through a hotfix.</p>
<p>STAFF: Remove assignment type setting from Manage Dynamic Question Rules UI</p>	<p>Removed a confusing display of assignment type in the DPI Admin page for Dynamic Questions setup - doesn't affect end users.</p>
<p>STAFF: Remove Homeless Liaison from Contacts</p>	<p>Removed Homeless Liaison from WISEstaff contacts. This is collected through other application now.</p>
