

Release Notes for 11/15/2016 WISEid/WISEstaff Production Release (WISEid Core Apps Sprint 122)

| Feature Title | Notes |
|---|--|
| WISEid: BUG - File Upload NOT populating birth location data fields within Production | Found issue where in previously Person a birth location field was null and later uploads included data the new data was being ignored. |
| WISEid: BUG - Person File Upload Column Header Errors | Fixed messages about Person upload column when not in correct format shows errors with spaces in the column names as is in the template. Also, fixed CSV file checker so it can handle columns with numbers in them without having spaces between words and numbers. Still recommend putting spaces between words and numbers as in template, but will process without the spaces. |
| WISEid: Change Request for RaceKey display letter codes | When viewing a Change Request for Race/ethnicity a full description is shown for each code. However, if person is multiple codes it just says "Two or more races". In future story we will break out all codes that make up these multiple codes. |
| WISEid: Do a full WSLS to WISEid Refresh of Changes | Did one last run of job that finds any updates to existing person that were made in WSLS but didn't get added to WISEid. |
| WISEid: Fix Local Person ID Type drop down menu | Drop down for Local Person ID Type in UI included "All" which is shouldn't have. We removed. |
| WISEid: Hotfix Adjust WSLS job to allow in legacy race key students | We found 40K persons in WSLS who hadn't gotten imported into WISEid. We imported them all now. If you have a connection to them you will need provide new race code for them in the future if you pick them up. Probably more an issue for staff. |

| | |
|---|---|
| WISEid: Hotfix Bug Fix Match Review Links | Results page Potential Matches links for uploads now go to just that files Potential Matches. |
| WISEid: Hotfix Results screen Change Request link filter broker | Results page Changes counter for change requests now filters for just the change requests in that file upload when it sends you to Messages and Change Requests page. |
| WISEid: person upload for Milwaukee Public Schools faults in prod | Resolved problems found in Milwaukee Public School Person uploads that caused faults. |
| WISEid: Update Last Enrollment Info on Match Review Screen | Change Last Enrollment Info to be more specific as last exit transaction on the Match Review Screen. |
| STAFF: Fix Contract Upload generation of Entity iD Change Requests | When you upload new or changed Entity IDs in Contract uploads they now create Change Requests for DPI to approve. |
| STAFF: Hotfix Contract file upload doesn't update existing contracts | Changes to fields that were previously null were not taking effect for Contract uploads. We fixed this issue. |
| STAFF: Hotfix Records missing WISEids or not valid WISEid causing Contract upload fault | When WISEids weren't valid, null or containing extra characters in the Contract upload it would cause the file to fault. We fixed this issue. |
| STAFF: Mothball Audit Review from Initial Agency Certification | We removed for this year the early initial audit snapshot process. DPI can only audit once so we do a statewide snapshot when we do the initial audit for everyone. |
